

REPORT
OF THE
BOARD OF GOVERNORS
OF THE
UNIVERSITY OF ALBERTA

YEAR ENDING DEC. 31st, 1918.

to the Board of Governors

of the University of Alberta

Enclosure:

In accordance with the requirements of the

PART I

University Act, section 7, I lay to

.....

submit, herewith, to the Board of the University

report on the work of the University for the academic

year ending May 31, 1954.

THE REPORT OF THE

the University, ACTING PRESIDENT

1. **STAFF**

.....

with the organization of the facilities during the current

year. They shall be given to you in the report of the

year 1954.

The staff during the year numbered various

positions, four assistant professors, eight lecturers,

six special lecturers, five demonstrators, ten assistants,

two demonstrators, and one research fellow.

In addition to the above staff employed in

the regular work of the University facilities, the Top

lectures were given in addition and helped by numerous

temporary lecturers selected from the local professions and

the law office.

To the Board of Governors
of the University of Alberta.

Gentlemen:

In accordance with the requirements of the University Act, Section 66, Subsection 7, I beg to submit, herewith, in the absence of the President a report on the work of the University for the academic year ending May 16th, 1918, the tenth annual report of the University, the eighth to your honorable body.

I. Teaching Staff

No changes have taken place in connection with the organization of the faculties during the current year. They stand as stated to you in the report of one year ago.

The staff during the year numbered sixteen professors, four assistant professors, eight lecturers, six special lecturers, five instructors, two assistants, two demonstrators, and one research fellow.

In addition to the above staff employed in the regular work within the University buildings, the law lectures were given in Edmonton and Calgary by seventeen honorary lecturers selected from the legal profession in the two cities.

With regard to the personnel of the staff, thirty members are absent on duty in connection with the war and temporary assistance has been obtained where necessary. During the year several other members have left for duties in connection with the war and for other causes.

A.L.Burt, Assistant Professor of History, joined the overseas forces as Lieutenant in the first Canadian Tank Battalion.

G. H. Steer, Lecturer in the Faculty of Law, joined the overseas forces as Lieutenant in the first Canadian Tank Battalion.

T. Marsden, Instructor in English and History and Acting Provost, enlisted in the first Canadian Tank Battalion.

S.A. Francis, Demonstrator in Mathematics, enlisted in the 78th Battery.

J. W. McKinney, assistant in Chemistry, enlisted in the Royal Air Force.

Dr. S. W. Dyde, Principal of Robertson College, who has been for some years special lecturer in Philosophy resigned to take up the duties of Principal of the Presbyterian Theological College at Queen's University.

New Appointments

Mr. A. J. Cook was appointed Instructor
in Mathematics to take the place of Mrs S.A. Francis

The War

Since last reported to you a considerable number of men have joined various military units. A few students were called up under the Military Service Act; some under military age have joined the Flying Corps and a few have enlisted in the Army Medical Corps. A large group left the University on April 26th. This was our contingent for the Canadian Universities Tank Battalion, and consisted of two officers and sixteen men and there was no difficulty in securing recruits.

Our new Honour Roll, which does great credit to the artistic skill of Assistant Professor Adam, was placed in the entrance hall about the middle of April and contains 344 names. Certain others together with recent enlistments in the Flying Corps and the Tank Battalion will raise the total at the close of the academic year to upwards of three hundred and eighty.

Appended is the Honour Roll giving some information regarding the part played in the war by members of the University who have joined our military forces.

P.S. Further enlistment up to the date of going to press of this report has raised the total contribution of the University to the various military services to approximately four hundred and thirty three.

The National Conference of Canadian Universities

The fifth national Conference of Canadian Universities was held in Ottawa on May 23rd, 1918. Seventeen institutions were represented by thirty four delegates. Various matters of importance in higher education were discussed. A report was given as to the progress of negotiations with British and French Universities in regard to graduate work and degrees. Dr. George R. Parkin, the Secretary of the Rhodes Scholarship Trust, addressed the Conference on the question of the proposed new method of selecting holders of scholarships. Dr. Parkin announced in this connection his intention of recommending that as far as possible the Committee of Selection should be composed of ex-Rhodes scholars.

The Conference was addressed later by Professor E.A. Mackenzie, Vice President of the Teachers' Insurance and Annuity Association of America, who explained the changes in their pension scheme soon to be put into force by the Carnegie Foundation. In brief, this involves a change from the original system of free pensions to a scheme consisting of contributory annuities and of insurance at cost.

On the invitation of the Conference, Lt. Col. Birks gave an account of the Khaki University of Canada. He told of the inception of the idea and of what had been accomplished up till the date of the Conference, under the direction of President H. E. Tory of the University of Alberta. After a sympathetic discussion the following resolution was unanimously adopted :

" That this Conference of Canadian Universities heartily endorses the Khaki University for Canadian Soldiers, under the principalship of Dr. H. M. Tory, resolves that a committee be appointed to consult with President Tory concerning the contemplated curriculum of said University, and urges Canadian Universities to accept the recommendations of this Committee with reference to the courses given at the Khaki University with a view to their acceptance as the equivalent of similar work done by them, in the case of students of this University who may desire to continue their studies after the war."

A report was presented by Dean R.W.Lee of McGill University dealing with the unsatisfactory condition of legal education in Canada. Criticism was levelled particularly against the fact that instruction in law is mostly in the hands of judges and practising lawyers and not professional teachers and further that legal studies and office practice are carried on at the same time. A resolution was passed directing the Committee on Legal Education to ascertain "how far it is practical to accept attendance at any qualified law school as a substitute for a corresponding period of indenture,

In respect to graduate work in Agriculture it was the opinion of the Conference that scholarships for advanced study in Agriculture should be provided out of the funds

supplied to the Provinces under the Dominion Agricultural Act and that such monies should be handed over to be administered by the Universities.

The report of the Committee on Graduate work gave an account of the negotiations between Toronto and McGill Universities looking to the establishment of a species of co-operative graduate school under the joint auspices of these two institutions. It was felt that good progress was being made towards providing a solution for the serious problem of making provision for advanced training for Canadian scholars in our own country.

The Conference adjourned to meet in Ottawa in May, 1919.

Student Registration for the Academic Year
ending May 16th, 1918.

The following classification of the student body under various heads, academic, social, and religious will give some indication of the manifold interests that enter into the University.

(A) Registration by Years

Graduate Students	19
Fourth Year	39
Third Year	53
Second Year	80
First Year	148
<hr/>	
Total	339

Of these 226 were men and 113 women.

The percentage of the women students of the whole student body is this year 33 1/3 % ,while last year it was 28% .

I am glad to report that the registration in graduate students has kept up. Nine students are this year completing their work for the master's degree and the total number of candidates for this degree would be appreciably larger were it not for the heavy enlistment amongst the men teachers in the province. Our Freshman Class this year shows a gratifying

increase of 25 over that of 1916, but is yet a good deal short of the class of 174 which entered the University in 1915.

(B) Registration by Faculties

As distributed in the various faculties and schools the numbers are as follows:

Arts and Sciences	159
Applied Science	10
Law	34
Medicine	48
Agriculture	34
Accountancy	0
Pharmacy	15
Graduate Courses	19
B.A., LL.B.	12
B.A., M.D.	6
B.A., B.Sc.	2

As anticipated in last year's report the Faculty of Agriculture has shown a gratifying increase in numbers, due doubtless in part to the addition of the third and final year. There are now enrolled in this faculty thirty three students which is an increase of thirteen over the registration of a year ago. It is to be expected that the numbers in this faculty will grow rapidly as soon, at least, as the abnormal war conditions have passed away.

The classes in Accountancy have temporarily dropped to zero, the probability being that it is the pressure of the war which has made it impossible for those previously taking this work to continue in the meantime.

A beginning has been made in the Department of Household Economics. One student, the product of the Provincial Schools of Agriculture has undertaken that work this year. It is hoped that next session a considerable number of students will be found enrolled in this department.

(C) Registration by Subjects

Subject	No. of Courses as shown in the Calendar	Number of Students	Total
Anatomy	1, 2, 10, 12, 14; 53, 54, 60;	12 <u>11</u>	23
Animal Husbandry	1; 2; 3; 51, 52a&b, 52, 53, 54, 55;	16 6 6 <u>9</u>	37

3. Not mentioned 4

(E) Distribution of Students in the Province

Of the total number of students 240 give their home addresses in the Province, representing the following places:

Aetna, Ardrossan, Battle Ridge, Bindloss, Botha, Calgary, Cardston, Carmangy, Carstairs, Caster, Claresholm, Colinton, Consort, Dalroy, Dayland, Dickson, Drumheller, Edmonton, Fort Saskatchewan, Gleichen, Hardisty, Hathersage, Hayter, High River, Innisfail, Islay, Lacombe, Lamont, Langdon, Lawndale, Leduc, Lethbridge, Lipton, Macleod, Magnolia, Mannville, Manola, Medicine Hat, Millet, Nanton, New Bridgen, Okotoks, Olds, Parkland, Ponoka, Provost, Red Deer, Red Willow, Retlaw, Sedgewick, Shandro, Stettler, Stirling, Stony Plain, St. Albert, Sunny Slope, Taber, Tofield, Valhalla, Vermilion, Viking, Vulcan, Wainwright, Youngstown, Zetland.

(F) The Religious Affiliations of the Students in the University as shown by their Registration Cards:

Presbyterian	103
Methodist	90
Anglican	35
Baptist	23
Roman Catholic	13
Greek Catholic	3
Lutheran	14
Hebrew	5
Unitarian	4
Congregationalist	2
Latter Day Saints	3
Christian Science	1
Mennonite	1
"Protestant"	7
"None"	2
Not mentioned	30

It will be noticed that leadership in numbers has been assumed by the Presbyterians and the Methodists have been brought into second place. There is scarcely any variety of religious opinion that is not represented in the student body and we may assume, therefore, as in previous years that all denominations have confidence in the impartial religious position which it is the duty of the Provincial University to take.

Scholarship

With regard to scholarship, I do not feel-- and here I think I am voicing the opinions of our staff in general-- that we are as satisfied this year as in some earlier years with standards of work done. Several facts however may be offered in explanation of this statement. I have just alluded to the matter of our students being in general younger. In the earlier years of the University life, the larger part of the student body was composed of persons who were paying their own expenses and who were anxious to get everything they could out of their time at the University. That situation has now materially altered. Prosperity has come to Alberta and we are beginning to receive most of our students from relatively well-to-do homes. In a large number of cases the young men and women who are studying with us are here at their parents' expense and have come to the University for the same reasons that attract the rising generation to long established institutions in settled communities. In addition to this, we have but few senior men students to set an example with us now. Practically everyone of military age and physically fit is overseas. Moreover the war situation has grown so much sterner and tenser that it is only fair to admit the increased difficulty in securing attention to the ordinary routine of study when

the most tremendous issues in history are being decided under our very eyes. There is, therefore, hope that with the return of normal times the conditions to which I have just alluded will disappear and the business of life, including scholarship, will return to a surer footing.

Discipline

In regard to discipline, the observations I have just made apply in some measure here also. The Absence of the senior men is keenly felt and the control of our younger and relatively well-to-do student body has presented more difficulties than was the case previously. I do not mean that anything of a really serious nature has occurred but a careful watch will have to be kept so that we may be sure that a certain irresponsibility which attaches to youth is kept in check and a sense of responsibility developed. Our students must be made to feel that they will have to assume responsibilities beyond their years in the sombre conditions through which the world is passing at present.

Summer School

The plant of the University was again during the summer of 1918 put at the disposition of the Provincial Department of Education in connection with the Summer School for Teachers. The University Departments of Field Husbandry, Chemistry, Horticulture, and Modern Languages were associated with the Department of Education in conducting this work. A commendably cordial spirit of co-operation marked the relations of Department and University officials under the principalship of Mr. G. F. McNally, M.A.; himself a graduate of this institution. The enrolment during the past session was two hundred and twenty-five. The decrease of eighty-five from the previous year is undoubtedly traceable to the pressure of the war.

Convocation

The Convocation for the year was held on
April 30th, 1918.

The following persons were admitted to degrees
in the University:

Admitted to the Degree of Bachelor of Arts

Evangelienne Victoria Allen
Miriam Lois Bowman (with second rank honours in Latin)
Lillian Cobb (first rank honours in English)
Margaret Haslewood Gold (with first rank honours in Latin)
Edith Georgina Hamilton
Isabella Taylor McDonald
Sr. Bernadette Anne McNamara
Sr. Mary Elizabeth McNamara
Klyne Elizabeth Moraw
Doris Catherine Smith
Grace Ann Stewart
Jessie Catherine Stewart
Herbert Donald Cartwright
James Fulton
Ernest George Keller
Thomas Henry Lonsdale
James Harwood Ogilvie
Nelius Theodore Renning
Edgar Smith
Thomas John Stainton
Douglas Macdonald Thomson

Admitted to the Degree of Bachelor of Arts, ad eundem:

George Patton Black
William J. Kindervater
William Joseph MacLeod
Samuel Caleb Ratcliffe

Admitted to the Degree of Bachelor of Science in Arts:

Norman McKee Stever

Admitted to the Degree of Bachelor of Science in Engineering:

Emil Skarin

Admitted to the Degree of Bachelor of Science in Agriculture:

Jesse Franklin Block
 Thomas Lake Brown
 Norman Ashwell Clark
 Ernest Cahill Mensies
 Carl August Scholl
 Robert David Sinclair
 Bertram John Whitbread

Admitted to the Degree of Bachelor of Laws:

Francis Michael Brady
 Thomas Bernard Devaney
 Francis Orestes McKenna
 William Edward Simpson
 John Joseph Tighe
 Thomas Henry Wells, B.A.
 Harry Arthur White, B.A.

Admitted to the Degree of Bachelor of Laws ,ad eundem:

Etienne Adolphe Felix de Savoye

Admitted to the Degree of Bachelor of Divinity:

Malcolm Stewart Kerr, B.A.
 Samuel Caleb Ratcliffe, B.A.
 Alfred Rehwinkel, B.A.

Admitted to the Degree of Master of Arts :

Jean Margaret Stuart, B.A.
 William Berry, B.A.
 Charles Carlyle Bremner, B.A.
 Sr. Mary Laura Hickey, B.A.
 James Elkanah Loucke, B . A.
 Daniel Arthur McKerricher, B.A.
 Samuel Caleb Ratcliffe, B.A.
 John Picard Suttill, B.A.

Admitted to the Degree of Master of Science in Arts:

William Frederick Seyer, B.A.

Admitted to the Degree of Doctor of Medicine, ad eundem:

Claude Vernon Jamieson

Professional Examinations

During the year there were conducted as heretofore the professional examinations for the following societies affiliated with the University:

The Law Society

The College of Physicians and Surgeons of Alberta

The Alberta Dental Association

The Institute of Chartered Accountants of Alberta

The Alberta Land Surveyors Association of Alberta

The Alberta Pharmaceutical Association

The Alberta Association of Architects.

Since the University Convocation in April, 1918, the following persons have passed the examinations for licence to practice in their various professions:

Accountancy- W. Dixon; H.A. Howard; J.C.F. Sells; F.M. Harvey;
H.H. Hash.

Law- F.G. Beaumont; R.V. Bellamy; F.M. Brady;
C.F. Jamieson; F.O. McKenna; H.C. Newland;
E.M. Robertson; J.J. Tighe; C.L. Beck; K. Blue;
J.P. Ferguson; M.I. Lieberman; J.T. Moyer;
J.G. Porter; R.M. Spankie; V.E. Way; T.B. Devaney;
T.H. Wells; H.A. White; A.J. Robertson.

Dentistry- Z. A. Morris; W.H.Scott; W.M.Duncan;
W. G. Neilson; E.M.Dunsworth; R.W.Reichman.

Medicine - H. Bonde; D.E.Bonde; R.E.Boyle; J.E.State;
P.A.Macdonald; O.O.Lyons; O.J.Short;
D.Mahoney.

Pharmacy- M.H.Foster; E.P.Munro; C.A.Jerney; J.R.Johnson;
H.Badcock; S.L.Eversfield; Miss H.H.Haag;
J.E.McCallum; E.F.Thurston; P.S.Brown;
Sr. M. Lafard; A.E.Hird; J.H.Magee

Department of Extension

The Report of the Department of Extension will be found as an appendix to this Report. The reason for so attaching it is that it covers matters of such great interest that as last year it is deemed wise not to summarize it but to give it in full.

Donations

During the year we have been in receipt of various donations for specific purposes from friends of the University. These have been reported to the University Senate for acceptance from time to time and are as follows:

The Rev. Charles H. Huestis, D.D. has offered an annual scholarship of \$25 to the students in the second year making the best record in the Department of English, special regard being had to the work in English Composition. The prize is to be known as the Harold Waldo Huestis Memorial Prize and has been founded by Dr. Huestis in memory of his son, Harold Waldo Huestis, who died at the front and who had earlier given promise in the field of English.

The Department of Geology is in receipt of the following donations:

1. Geological Survey Ottawa- Upwards of 1000 fossils from the geological formations in Alberta and Saskatchewan, collected by Professor J. A. Allan in the summer of 1917.
2. Mines Branch, Department of Mines, Ottawa - 125 specimens of minerals and ores from Canadian localities, many of rare occurrence.
3. Munition Resources Commission, Ottawa- Molybdenite specimens, one large specimen of exceptional quality.

4. Imperial Munitions Board, Ottawa, - Suite of special minerals used in munition works, and in manufacturing special hard steels.
5. Carborundum specimens and products from which carborundum is made: Exelon Company, Thorold, Ont.
6. Dr. W. F. Ferrier: Minerals.
7. Dr. E. Sisley: Molybdenum and manganese specimens.
8. Mr. J. Boss: Silver specimen of rare quality.
9. Mr. J. C. Houston: Native Silver, Cobalt and Gypsum specimens.
10. Mr. J. Tait: Gypsum and Petroleum specimens.
11. Mr. P.W. Racey: Silver ores from Alice Arm, B.C.
12. Rev. Wm. Minshaw, Peace River: Pre -Glacial Elephant tooth, a unique specimen in that this is the first discovery of such a specimen in western Canada.
13. Mr. F. W. Gadsal: Curios from India, West Indies, South Sea Islands and Alberta Indians.

14.

The class of 1918 as a graduation gift has presented the University with busts of Shakespere and Cicero. These have been placed in the library.

New Requirements

Since the war broke out every possible effort has been made to operate the University with the most rigid economy. Our laboratories have added practically nothing to their equipment in apparatus and stocks of working material have been allowed to run down to a bare minimum. Owing to sudden expansion in the scientific departments- especially in the Faculty of Medicine- some of the laboratories are already crowded beyond capacity and the need is pressing at once for additional apparatus and in the immediate future for more space.

A small sum will be required to complete the equipment of the Household Economics laboratory; additional barn accommodation is needed for both Animal and Field Husbandry; a pressing want is upon the Faculty of Agriculture for at least a half section more of land for the purpose of conducting farm operations both to care for our rapidly increasing stock and also to extend our demonstrations and experiments to commercial dimensions.

With the prospective coming into operation of a Department of Mining Engineering a laboratory will be required for that department similar to the Mechanical Laboratory now in existence. In order also to relieve congestion already upon our buildings will be needed in the near future for both the Faculties of Agriculture and Medicine.

Conclusion

As is well known President Gory was granted leave of absence in December last in order that he might proceed overseas and undertake the direction of the Khaki University, an organization suggested by himself to superintend educational work in the Canadian Army. In spite of the absence of the President and of the difficult conditions imposed by war times, the work of the University has gone steadily forward and every effort has been made to carry on. With the advent of peace and the era of reconstruction at hand, if the University is to make the contribution which the public is right in looking for, comprehensive plans must be made for the development of this institution during the coming critical years. Given adequate support, it is my confident belief that the University of Alberta can in the future render even greater service to the public than in the past.

All of which is respectfully submitted .

Acting President.

THE REPORT OF THE DEPARTMENT OF EXTENSION

REPORT OF THE DEPARTMENT OF EXTENSION
UNIVERSITY OF ALBERTA

July 1, 1917 --- June 30th, 1918

I have the honour to submit herewith the annual report of the Department of Extension for the academic year ending, June 30, 1918.

The several activities of the Department will be dealt with briefly under the usual heads, viz: Extension Lectures, Publications, Debating and Public Discussion, Visual Instruction, Travelling Libraries, and Exhibits, to which I will add a reference to the work of the St. John Ambulance Association, conducted from this office.

Extension Lectures

Since the outbreak of the war it has been found increasingly difficult to maintain this valuable service owing to the depletion of the several Faculties of the University whose members hitherto lent assistance, but who have since devoted themselves to one or other of the various branches of war work overseas. On the first of November last we suffered the irreparable temporary loss of the Director of the Department in the person of Mr. Ottewell who accepted a post in connection with the Khaki University in England.

Prior to his departure, during the months July, August, September, and October, Mr. Ottewell delivered a total of thirty one lectures at twenty seven different points in the province, at which there was an aggregate attendance of three thousand five hundred. The average attendance of practically one hundred and thirteen showed a considerable increase over the record of the previous year. These lectures, three of

which were delivered in the city of Edmonton, were accompanied by moving picture and lantern displays.

With the exception of one lecture delivered by Mr. H.P. Brown, Superintendent of the Visual Instruction Division, at Springvale on the work of the Military Hospitals Commission, accompanied by a set of slides supplied by the Commission, the above represents the total accomplishment in this Division of the Department's activity.

PUBLICATIONS

A new catalogue of the Open Shelf books was published in the early part of the year. In the effort to meet the rapidly increasing demand for books many new ones have been placed on the shelves necessitating the publication of a supplement to the catalogue. This is now in the hands of the printer.

It was decided by the Extension Committee not to issue a new edition of the Legal Status of Women compiled by Mrs. Edwards, although the former edition of 2000 copies has been exhausted. The necessity for rigid economy prompted this decision, and it was felt that as the principal demand for the book comes from the Women's Institutes, which is a division of the Provincial Department of Agriculture, the republication might well be left to the Government if it is found necessary.

DEBATING AND PUBLIC DISCUSSION

The package library comprises material specially prepared for debates, together with articles, bulletins, and pamphlets on live topics of public interest arranged in convenient form for circulation. There are forty-four subjects included in the former, while the latter material is arranged under about twenty general headings. During the year these

have been pretty thoroughly overhauled, revised, rebound and re-classified. These packages have had a circulation, during the period under review, of 475. At first sight this would seem to compare very unfavorably with the preceding twelve months, the record of which showed a circulation of 1046 packages. But when it is recalled that heretofore the circulation of the Open Shelf books was recorded in this Division, the discrepancy disappears entirely. In fact there was a very material increase in strictly package material.

As stated in my interim report of April 30th., it was not found practicable to reorganize the High School Debating League last autumn; nor will it likely be revived during the continuation of the war.

VISUAL INSTRUCTION

This Division is becoming increasingly popular and our resources have been taxed to meet the rapidly growing demand. We have sought to offset the discontinuance of the Extension Lectures by intensifying our effort to encourage the use of our lantern slide sets and the accompanying lectures by capable persons throughout the province. In this we have met with a gratifying measure of success.

We have added fifteen new sets of slides during the year, bringing our total up to 70 sets. The circulation reached 409 as against 309 last year. As many borrowers use the same set of slides at several different points in their neighborhoods it would not be in any degree rash to estimate that 600 such lectures and displays have been given. Our records show that an average attendance of 50 is a conservative estimate. The aggregate attendance would therefore reach 30,000.

We have compiled a directory of the lantern users in the province

and are able to keep in touch with them and ascertain their requirements. An effort is being made to secure for tabulation detailed reports of the use of the slides and the attendance at each display. This will enable the future reporting with accuracy of many details not available heretofore.

The Pathoscope (moving picture) service supplied by the Division has proved very popular. A film service is now being supplied to about 17 users, fifteen of which secured their machines through this Department. The use of the Pathoscope is capable of great extension, but we have not attempted to push it owing to the difficulty of getting both machines and films - the manufacturers in France having closed down.

An American-made machine and films are now available. The price of the films is about 40% higher than before, but we expect to be able to secure sufficient to satisfy the present service for another season.

This service is supplied on a rental basis and if sufficiently large would be self-supporting. It will require a considerable initial expenditure to bring it to this point, and for this the money is not now available.

There are 115 films which are grouped in sets of five to suit the patrons. One hundred and ninety-seven of these sets have been sent out during the year. Basing an estimate on fairly complete records since January 1st., it would appear that these 197 sets were exhibited 400 times to an aggregate of 13,000 people.

TRAVELLING LIBRARIES

Under present conditions the records of this Division must be considered very satisfactory. Notwithstanding the depletion of the

young and progressive members of the various communities, only a very slight decrease has occurred in the circulation of the Travelling Libraries while the Open Shelf circulation has doubled. The number of libraries in circulation is 129, an increase of three. These served 147 communities and the number of exchanges amounted to 259. The average circulation of 64 represents the least favorable aspect of the record. The average circulation of last year showed 116. The circulation of the Open Shelf books increased from 761 the previous year to 1528, the monthly average being 127 as compared with 63.41.

A striking feature of the circulation of the Travelling Libraries is that while the demand usually drops rather sharply at the end of March, this year it was well maintained to the end of June.

Permit me to repeat a few particulars which were recorded in the interim report of April 30th., as these are of peculiar interest:

"The Books most called for have been those in the two classes, Sociology and Useful Arts. Under Sociology, books on every phase of Education and Social Service, especially with relation to life in rural districts, have been much read, while under Useful Arts, the largest circulation has been from the groups, Home Economics, Food and Dietetics, and Agriculture and Farming. An increasing number of individuals draw books from the Open Shelf library regularly every two or three weeks.

"The work with clubs has also increased. Groups of books on special subjects are supplied with the Study Outlines prepared by the Department. Miscellaneous groups are also supplied. United Farmers of Alberta and United Farm Women Locals, Women's Institutes, and Literary Societies are among the clubs using such groups, and the Department is

also being asked to provide groups of books suitable for boys and girls of 'teen age, clubs for whom are being formed all over the Province.....

"The help of the Department is being more and more sought in ways impossible to tabulate or even to mention in a regular report. Individuals ask for advice as to the best books to buy on certain subjects, the best periodicals of a literary character or for a knowledge of current events, or to supplement those for which they have already subscribed, and inquire about the publishers and prices of books and periodicals. Clubs ask for information on how to organize, how to conduct their meetings, and how to draw up programmes, as well as for material to help carry out programs already prepared. Two communities which have been using our travelling libraries for a year or two, have this year decided to establish small local libraries and have written to the Department for advice as to equipment and management."

Eleven hundred and sixty-two books have been added to the Library.

CONFERENCES

The second annual Conference for Rural Leadership was held at the University on August 6th. to 10th. The delegates in attendance numbered 51, which represented a very considerable falling off from the previous year. The interest, however, was lively and it is believed that the expenditure of effort in its organization and conduct was fully justified.

It has been thought wise, during the period of the war, to discontinue these Conferences, but it is proposed that the work, which is very promising, shall be resumed when conditions are favorable.

Although the Girls' Conference which was held in Edmonton from the 12th. to the 14th. of April was not conducted under the auspices of this Department, we were able to lend assistance to it by placing at its

disposal the services of Miss J. F. Montgomery in the capacity of secretary, an urgent request to this end having been received from Mrs. A.A. Pinckney. Though somewhat reluctant at first to have further tasks imposed upon Miss Montgomery, whose regular duties as librarian are by no means light, I was prevailed upon to consent by the apparent needs of the case and Miss Montgomery's cheerful willingness to undertake the work. The promoters of the Conference placed efficient assistance at the disposal of the Secretary in our own offices, and I have been assured that no small share of credit for the success achieved was due to the assistance we were able to render.

EXHIBITS

Recognizing the value of exhibits at various conferences and gatherings held at central points, as a means of publicity, we have been represented, as in former years, at the principal gatherings of religious denominations, the United Farmers of Alberta, the United Farm Women of Alberta, as well as at the several Conferences of boys and girls.

ST. JOHN AMBULANCE ASSOCIATION

The work of the St. John Ambulance Association for Alberta was taken over by the Department of Extension in October, 1916. Mr. Ottewell was appointed Honorary Secretary-treasurer, and on his going overseas, the present Acting Director was appointed in his place.

The work of the Association as directed from this Department is:

(1) The instruction of persons in rendering First Aid in cases of accidents or sudden illness, and in the transport of the sick and injured.

(2) The instruction of persons in the elementary principles and practice of Nursing and also of Hygiene and Sanitation.

In the carrying on of this work classes are organized under local centres in the various towns, villages and country districts throughout the province. The whole work is under the direction of the Dominion Council at Ottawa. Instruction is given by qualified physicians and nurses and examinations conducted by the same. Supplies of books, bandages, etc., are furnished from this Department, and all records for the province are likewise kept here.

During the 21 months in which this work has been in the Department 60 classes have been held in 16 different centres and certificates have been issued to 855 persons.

There are at present 14 local centres in which instruction in First Aid and Home Nursing is being given. These are Bellevue, Calgary, Coleman, Edmonton, High Prairie, Lethbridge, Medicine Hat, Mordegg, Olds, Peace River, Sedgewick, Stavely, and the Summer School for Teachers, at the University of Alberta.

CONCLUSION

Undoubtedly the Department has suffered much from the absence of the Director, Mr. Ottewell, whose efficiency has been so thoroughly demonstrated in the organization and upbuilding of the work in past years. His ability, enthusiasm and experience have been instrumental in achieving a standard of success which it is not easy to maintain in his absence. What degree of success has been attained during the period in which I have had the privilege of assisting the work in the capacity of Acting Director is due wholly to the loyalty and efficiency of the various members of the staff of whose services I cannot speak too highly.

What assistance I have been able to render to the Department

61

in the comparatively limited time at my disposal has been a source of great pleasure and satisfaction, and I have been greatly cheered by the numerous and repeated expressions of appreciation of the value of the services we are able to render, which have been received from our patrons generally.

All of which is respectfully submitted.

A handwritten signature in dark ink, appearing to read "H. K. Lacy". The signature is written in a cursive style with a horizontal line underneath.

Acting Director.

A P P E N D I X I I I

THE REPORT OF THE PROVINCIAL LABORATORY

REPORT OF THE DIRECTOR OF THE
PROVINCIAL LABORATORY

I have the honour to submit the following report of the work of the Provincial Laboratory for the year 1918.

The Provincial Laboratory carries out most of the technical work of the Government in public health, medico-legal investigations, diseases of animals, and miscellaneous examinations.

Public health investigations relate to the diagnosis of some communicable diseases, the examination of water samples, and analysis of food including milk.

During 1918 examinations were made for the diagnosis of diphtheria, typhoid fever, and pulmonary tuberculosis as shown in the following table:-

SPECIMENS EXAMINED FOR THE DIAGNOSIS OF COMMUNICABLE DISEASES

DISEASE	No of Specimens	Results	Specimens sent from		No. of No. of P. O'S	Number of Specimens received each month					
			Pos've	Neg've		Mth.	Spu'm	Diph.	Typ'd	TOTAL	
Pulmonary Tuberculosis	95	283	159	84	Jan.	36	34	8	78		
					Feb.	36	23	3	62		
					Mar.	39	27	5	71		
					Apr.	46	28	18	92		
Diphtheria	106	278			May.	43	31	19	93		
					June	34	32	10	76		
					July	31	25	4	60		
					Aug.	24	12	8	44		
TYPHOID Fever	17	82			Sept.	20	45	11	76		
					Oct.	28	69	12	109		
					Nov.	12	25	4	41		
					Dec.	29	33	4	66		
TOTAL	216	660	159	84		378	384	106	868		

During the past year there were 378 specimens of sputum examined, of these 95 were positive. A table has been prepared comparing the clinical diagnosis of the condition with the laboratory findings, and is as follows:-

Mo. re'lts with pos'ive diagnosis	Pos. re'lts with diagnosis other than T.B.	Pos. re'lts with pos. diagnosis	Pos. re'lts with no diagnosis	Neg. re'lts with diag other than T.B.	Neg re'l with no diagno.
Jan.	4	0	7	3	4
Feb.	2	0	9	4	3

Apr.	5	2	3	3	8
May	6	1	7	8	8
June	11	1	3	3	3
July	4	1	4	2	4
Aug.	1	0	2	7	4
Sept.	2	2	3	2	3
Oct.	5	0	2	3	3
Nov.	1	1	4	1	4
Dec.	1	1	2	4	3
	46	11	49	44	54
					176

TOTAL 378

In 1918 there were 384 throat swabs sent in for examination, 106 of these were positive.

Antityphoid Vaccine for the inoculation of the troops has been prepared during the last four years for the Militia Department of Canada. 211,000 doses have so far been supplied. During the past two years the Department of Bacteriology has been supplying the necessary vaccine for the Provinces of Saskatchewan, Alberta, and British Columbia. This is a mixed vaccine containing the typhoid, paratyphoid (A), and paratyphoid (B) bacilli and is made from the strain of the organism supplied by the Royal Army Medical Corps.

There were 24 samples of milk examined. Other samples were received but were unsuitable for examination. Many of these specimens were sour on arrival and many others were received in dirty containers so that any examination would be valueless.

Samples of mother's milk to the number of 64 were examined during the year. These were done for the purpose of advising physicians when breast feeding was not satisfactory for an infant.

There were 420 samples of water analysed Bacteriologically to ascertain its suitability for domestic purposes.

To His Honour

The Lieutenant Governor in Council.

Sir:

On behalf of the Board of Governors of the University of Alberta, and in accordance with Section 31, Subsection 2, of an Act respecting the University of Alberta, the undersigned have the honour to transmit to you, through the Minister of Education, the Report of the University for the year closing December 31st, 1918.

The report consists of two parts, Part I - the report of the Acting President on the academic work of the University, and Part II - the financial statement for the year.

We have the honour to remain your obedient servants.

Chairman,

Acting President.

For the City of Edmonton 11 Bacteriological examinations were made on samples from their experimental plant for the disposal of sewage.

Miscellaneous examinations to the number of 369 were carried out during the year. These were of various natures, some of which might be mentioned: Examinations of fowl for tuberculosis and other diseases, bacteriological examination of canned fruits, urine examinations, etc.

During the recent epidemic of Influenza bacteriological work was done by the laboratory. This work confirmed the results obtained in other laboratories from sputum, lung punctures and post mortem smears. From the lungs the Influenza bacillus was found while a diplo-streptococcus and pneumococcus of the different types were commonly found.

A prophylactic vaccine was prepared composed of Influenza bacillus various strains of the pneumococcus and streptococcus which appeared to be of benefit in the prevention of the complications in the prevailing epidemic.

The period of immunity given by this vaccine appears to be about six weeks, 40,000 doses were pre-

pared and sent out in 50 c.c. bottles with rubber stoppers and directions accompanying each bottle. A questionnaire was sent out and from the analyses of the replies the following information was obtained.-

No. doctors who used the vaccine	66
No. " " did not use the vaccine	27
<u>TOTAL</u>	<u>93</u>

4380	Cases inoculated
367	Received 1 dose
2965	" 2 "
1048	" 3 "

REACTIONS MILD

16	Cases of pneumonia
6	Had received only 1 dose
2	Deaths
1	Had received only 1 dose

THOSE WHO SUFFERED FROM PNEUMONIA HAD A MILDLY TYPE.

It seems necessary to again call attention to a number of irregularities in the sending of specimens to the laboratory. These irregularities, 121 of which were recorded during the year, were of different characters. During a period of three months 15 samples of water were sent to the laboratory presumably for analysis but there was no information given by which the sender could be identified. Many specimens were sent for the diagnosis of tuberculosis, diphtheria and typhoid fever without information and hence no report could be sent to the attending physician.

All waters for bacteriological examination must be sent in packed in ice. Special containers for which are supplied by the laboratory. Bulletins and circulars have been repeatedly sent out to Medical Health Officers and others who have to do with the sanitary condition of the Province, stating how these specimens should be sent. Notwithstanding this specimens of all characters are constantly being received and are unsuitable for examination. These special containers for the transmission of water samples have been sent on request, in many cases great difficulty has been experienced in getting them returned so that the regular work of the laboratory is sometimes interrupted.

During the year 1915 outfits for the sending in of throat swabs for diphtheria, sputum for tuberculosis, and blood for typhoid fever tests were sent out to our distributing stations in the Province.

Early in the year 1918 it was decided by the Board of Health that a Serologist be appointed to the Provincial Laboratory. His duties were: The examination of blood for syphilis by the Wassermann reaction and the examination of smears for gonorrhoea. A Canadian Pathologist who was serving in France was appointed to do

this work but it was impossible to secure his release from the Militia Department. A well trained technician, Mr. German, who had done over 8000 Wassermanns for No 1. Canadian General Laboratory, Folkestone, England, was appointed to do the work under the supervision of the Director of the Laboratory. Special outfits have been procured and these are being sent out together with full directions for their use to the different depots already made use of for the other diagnostic outfit for the Laboratory. A bulletin dealing with the methods of diagnosis of Venereal disease has been prepared and is being sent to all the medical men of the Province.

I have the honor to be

Sir

Your obedient servant

Robert C. Jamieson

REPORT OF THE PROVINCIAL ANALYST.

1918

The following Chemical examinations were made:-

Water analyses	178
Mineral water	8
Liquor analyses	582
Milk	22
Drugs, medicines, etc.	39
Extracts - lemon, ginger, etc.	36
Alcohol in extracts	35
Boiler water	4
Food analyses	8
Samples tested for poisons, human and animal organs, meat, etc.	93
Jam	8
Patent medicines	14
Miscellaneous	108
Consultations	
Court Attendance	

These comprise to a great extent examinations carried on in assisting the Department of Attorney General in criminal and liquor license branches.

The water examinations include waters from towns and cities, and from farmers throughout the Province to ascertain the suitability for domestic supply.

A great deal of consulting chemical work was also done by the Analyst in connection with public health, legal cases and industrial results. He had also to be present in many court cases in various parts of the Province.

I have the honor to be
Sir
Your obedient servant

PROVINCIAL ANALYST.

To the Board of Governors,

The University of Alberta.

Sir:-

Herewith is submitted the Financial statement of the University of Alberta for the year ending December 31st, 1918, including:

Statement of Assets and Liabilities;

Statement of Income and Expenditure;

Statement of Cash Receipts, and

Various Schedules as indicated.

The inventories have been signed by the persons in charge of the respective departments, the statements and schedules have been prepared under my direction, and, in my opinion, they properly and correctly set forth the financial operations of the University for the period indicated.

Your obedient servant,

"Cecil E. Race"

Registrar.

Edmonton, March 12, 1919.

I hereby certify that this is a correct statement according to the books.

The inventory valuations have been accepted on the certificate of the officials responsible for valuations.

"E. E. Burley"

Provincial Auditor.
